

Thermopad

Heat Therapy is an age old, but **effective & safe** therapy in ailments like aching **joints**, muscular **sprains**, or simply **cold** extremities.

Thermopad (Patent Pending) by Fazaltech Innovators (FTI) has been ergonomically designed around the needs of the user who may be an **old** or **young** person warming his / her feet, an **athlete** treating a sprain, or a **busy executive** seeking relief in backache while chairing an **office meeting**. It is **small** and **portable**. Taking little space in your luggage, it travels with you. Its auto temperature **FOUR** heating zone system keep the prefixed temperature constant; **no skin burns** thus is distinctly superior to all other models of heating pads in the market. Its **special electronic design** gives it exceptional reliability.

Specifications & Salient Features

Power: 220 VAC– Will Tolerate Very Wide fluctuations. Other voltages are possible.

Heater: Approx 60 watt on Flexible Glass Core

Energy Efficiency: Optimum. Heater automatically turns on-off around the selected heat. Consumes just about the amount of energy your body absorbs from it.

Shock Safety: Perfectly safe. 4 Layers Insulation.

Heat Diffuser: 4 Layer

Duty Cycle: 24 Hour, uninterrupted, but heater keeps switching off and on again around the set temperature.

Temperature Control: Closed Loop and Space Distributed

Sensors: Auto Shut Down for safety if no Sensor Signal

Temperature Levels: Hi/Lo Switching and One-Face-Hotter-than-Other gives Four Heats. Toggle Switch Avoids Unintended Change.

Physical Data

Pad: 25 x 35 cm (Other sizes Possible), Flexible, Foldable, and Portable. Control Box: 11 x 5.5 x 2 cm

Packed Size Overall : 27x18x6 cm

Cost : Cheaper than even non-automatic competitors.

Warrantee: Free repair at our premises for one year.
